4. I am good at math.				
5. I like doing computations (adding, subtracting, multiplying, and dividing) in math.				
6. I am good at doing computations in math.				
7. I like problem-solving activities in math.				
8. I am good at problem-solving activities in math.				
9. I prefer to work in a group for math activities.				
10. It is easy for me to complete individual assignments without assistance.				
11. I feel comfortable answering questions aloud during math class.				
12. I learn math better when the teacher uses manipulatives (hands-on activities).				
13. I enjoy using a computer to practise math.				
14. I like to do projects in math.				

15. For me to be successful in math class, I need:

Tell Me More

1. Name a topic from math class last year that you liked and felt that you understood well. Why?

2. Name a topic from math class last year that you did not like or understand well. Why?

3. List 2-5 things that your teacher did in math class last year that helped you learn.

4. What do I need to know about you in order to help you make this a successful year in math?

5. What can we work on together this year to help make you a stronger student?
